Moreover, advanced learners were given additional materials for each topic and Buddy B/C was given extra online time for doubt clarification. The identification of a learner as advanced (Buddy A) or slow (Buddy B/C) was done using two indices: #performance in the previous examinations and #active and effective participation in the classroom

STRATOSPHERE -TROPOSPHERE (ST) RADAR CENTRE Gauhati University

Year of establishment: 2019

Director in-charge: Dr. Biman J. Medhi

The climatic environment of the North Eastern region of India is significantly influenced by the different major atmospheric and ocean energy systems like the West Pacific Ocean energy system, the South-West monsoon, the North-East trade wind system and South Asian land mass energy system. These factors along with zonal orographic structure have made this region a unique natural laboratory which is yet to be explored. High resolution remote sensing data up to the stratosphere over this region will be scientifically very important for framing plans and socio-economic programmes, mitigation of natural calamity in the context and understanding of global climatic changes. This special zone is focus of solar terrestrial energy dynamic meet with flow of wind through four corridors carrying sea salt and aerosols from Bay of Bengal and China. Along with these factors, zonal orographic structure has made this region a special natural laboratory which is yet to be explored.

The GU ST Radar has 576 number of co-phased active aperture antenna arrays, 576 Transmit-Receive (TR) Modules, Digital Receiver equipped with advanced signal processing techniques. It will provide very high-resolution atmospheric parameters. Still, the Radar system is running in the project mode by SAMEER, Mumbai for fine tuning of the system specifications and not handed over to the Gauhati University.

Presently, the ST Radar centre is focusing on different atmospheric research and developmental activity related to RADAR. The seasonal data observed from the system are being analysed and interpreted. The system maintenance and its further development to receive high quality data up to stratosphere are also going on parallelly. Gauhati University is participated and an active member of the “Cooperative research using ST/MST radar” of national radar network.

DAY CARE CENTRE, GAUHATI UNIVERSITY

Year of establishment: 2015

In-charge: Dr. Jagadish Sarma

Day Care Centre (Crèche), Gauhati University facility was established to provide supervision and care of infants and young children during the daytime. It is situated in the Gauhati University Hospital campus and is run with the help of an NGO, Zutshi Shanti Home Welfare Trust, Guwahati, by a management committee comprising of Gauhati University employees. The centre was started realizing the societal need of the working parents of the University community.

Considering the size of the house at present, the Centre is managing maximum of 20 children with the age limit between 6 months to 10 years. From its inception, there are 20 children on roll at the Centre. During the last year, the attendance of children at the Centre has fluctuated due to concerns relating to the COVID19 pandemic. At the beginning of the academic year (in the month of April 2020), there were 11 children who attended the Centre. The Centre had to remain closed for four months (April 2020, July 2020) during the year following the directives of the government and the University. However, the number of children has increased significantly since November 2020 as the situation has reportedly shown improvement in terms of the pandemic. There are four employees at the Centre at present who look after the Centre and the children. In this financial year, one Management Committee meeting was

held on 17/03/2021 and one Parent meeting was held on 24/03/2021. Some basic facilities were also increased in this centre this year. All basic amenities required for the centre are provided by the Gauhati University authorities and some by the willing parents. The centre has helped the children in socializing and given the parents peace of mind of leaving their wards in trained supervision.
