Schedule 2

Project Proposal

Given below is the project proposal submitted:

Project summary (250 words maximum)

Literacy is a core requirement in learning a content subject. However, to build content knowledge we need a greater understanding of how the language in a specific discipline works. "Being literate in a discipline means both deep knowledge of disciplinary content and keen understanding of disciplinary ways of making meaning." (Fang, 2012).

In India, English is widely used as a medium of instruction, especially at the tertiary level. Learners at the undergraduate and postgraduate level are required to possess high level reading skills in English that their chosen field of study demands as every discipline has its own structure of discourse.

This project seeks to identify the reading strategies that are used to comprehend texts in a specific disciplinary specialism namely, the field of information technology. For this purpose, two sets of participants will be used for data collection- the teachers of the department of Information Technology of Gauhati University and the second semester students of that department.

It is believed that this project will help in formulating effective reading strategies that can be integrated by the teachers of information technology to improve the discipline specific reading skills of their learners. The three objectives of the project are to:

- Identify the discipline specific reading strategies in Information Technology
- Formulate effective reading strategies that can positively influence the reading abilities of the learners
- Collaboratively Engage teachers of IT in helping learners deal with the discipline specific reading issues in English by following the CPD track

Statement of research issue or problem (50-100 words)

Disciplinary literacy is not yet a well-recognised area of research and practice in India. There is a need for ELT practitioners to explore disciplinary literacy skills at the tertiary level as English is widely used as a medium of instruction here. Learners, who move to this level without much support on disciplinary literacy at the school level, find it challenging to read texts in English that demand high-level discipline specific reading skills.

This project seeks to identify:

- the reading strategies that are used in the field of information technology
- the reading problems that learners face in comprehending the texts

The Grant amount of INR 184500 is to cover the following costs:

- Rs.147000 for conducting an independent research on the topic selected by the researcher, attending a one and half day workshop, monthly webinars and quarterly counselling session. It also includes collating and interpreting data, conducting research on a specific aspect of ELT in their local context, participating in a digital community of ELT researchers who support each other during the research process and present their findings.
- Rs.37500 as travel bursary to attend one workshop in India to cover expenses of subsistence, accommodation, flights and cabs.

If the parties are unable to resolve the dispute or claim in accordance with this clause 22.3, either party may commence proceedings in accordance with clause 22.2.

Emerging Investigators in Crystal Growth & Design

<https://axial.acs.org/2019/03/13/emerging-investigators-in-crystal-growth-design/>

It is my pleasure to inform that a special Crystal Growth & Design (CGD) virtual issue, with contributions representative of the amazing new authors contributing to CGD has been published recently in ACS website.

In the virtual collection, 22 publications with featured authors from nine countries have been selected. The scope of science and application in the virtual issue is truly representative of the inclusiveness and diversity that touch on important topics such as Co-Crystals, Crystal Engineering, Crystal Growth, Halogen Bonding, Hydrogen Bonding, Mechanochemistry, MOFs, Nucleation, pi-pi Stacking, Simulation and Modeling, Solid State Synthesis, and Supramolecular Chemistry, or applications such as Catalysts, Nonlinear Optics, Pharmaceuticals, and Sensing, and compare these to the topics on CGD covers.

In the above link readers can find details of the work and biography of the selected authors of the VSI.

In the VSI, one of my work on “*Preparation of Pyrazinamide Eutectics Vs. Cocrystals Based on Supramolecular Synthons Variations*” *Cryst. Growth Des.*, **2018**, 18 (11), 6640-6651; have been considered.

If you are employed, the fellowship has been awarded to you on the assumption that you will be given leave by your employer for your research/teaching/professional development in the U.S. This should be confirmed officially to us as soon as possible. Since funds in this program are extremely limited, no extensions are possible.

You should feel free to communicate with USIEF and IIE concerning any problems that may arise during your stay in the U.S. Please contact **Dr. Sudarsan Dash**, Senior Program Officer, Indian Program, USIEF-New Delhi at Sudarsan@usief.org.in and **Ms. Viji S. All matters relating to international travel, except in the case of emergency, should be taken up directly with USIEF in India at least two months before your departure from the U.S. You are expected to return to India as soon as your grant ends in the U.S.

USIEF will disburse your monthly stipend and applicable allowances, unless otherwise specified, through wire transfer to your U.S. bank account. Please provide USIEF the required U.S. bank information on the prescribed format immediately after opening your U.S. account.

USIEF expects you to remain in touch with USIEF and IIE during the course of your grant. You will have to submit a **mid-term report**, half way through the grant period, to USIEF. In addition, you are required to submit **two** reports on your U.S. experience and impressions -- one to IIE at the end of your stay before leaving the U.S. and the second to USIEF after your return. The report templates will be given to you at the appropriate time.

Please note that extension is not possible under the Fulbright-Nehru awards. Visiting Fulbright-Nehru scholars are subject to the two-year foreign residence requirement associated with the J-1 visa.

This means that you are not eligible to apply for status in the U.S. as permanent resident, H temporary worker/trainee, or L intra-company transferee until you have resided and been physically present in India for at least two years following your departure from the United States.

We wish you all the best for your Fulbright-Nehru Program in the U.S.
